

Integrate in osCommerce plugin for export:

1. [Download plugin for OsCommerce;](#)
2. Unzip file;

installation guide

*1. Copy all files from the "copy_this" folder and put it in shop directory(**image 0**)

*2. Open the file "shop directory" >> checkout_success.php

*3. Put at the end of file, before "require(DIR_WS_INCLUDES . 'template_bottom.php');" following line :

```
include_once(DIR_WS_MODULES . "tracking_pixel/tp_checkout.php");  
#####
```

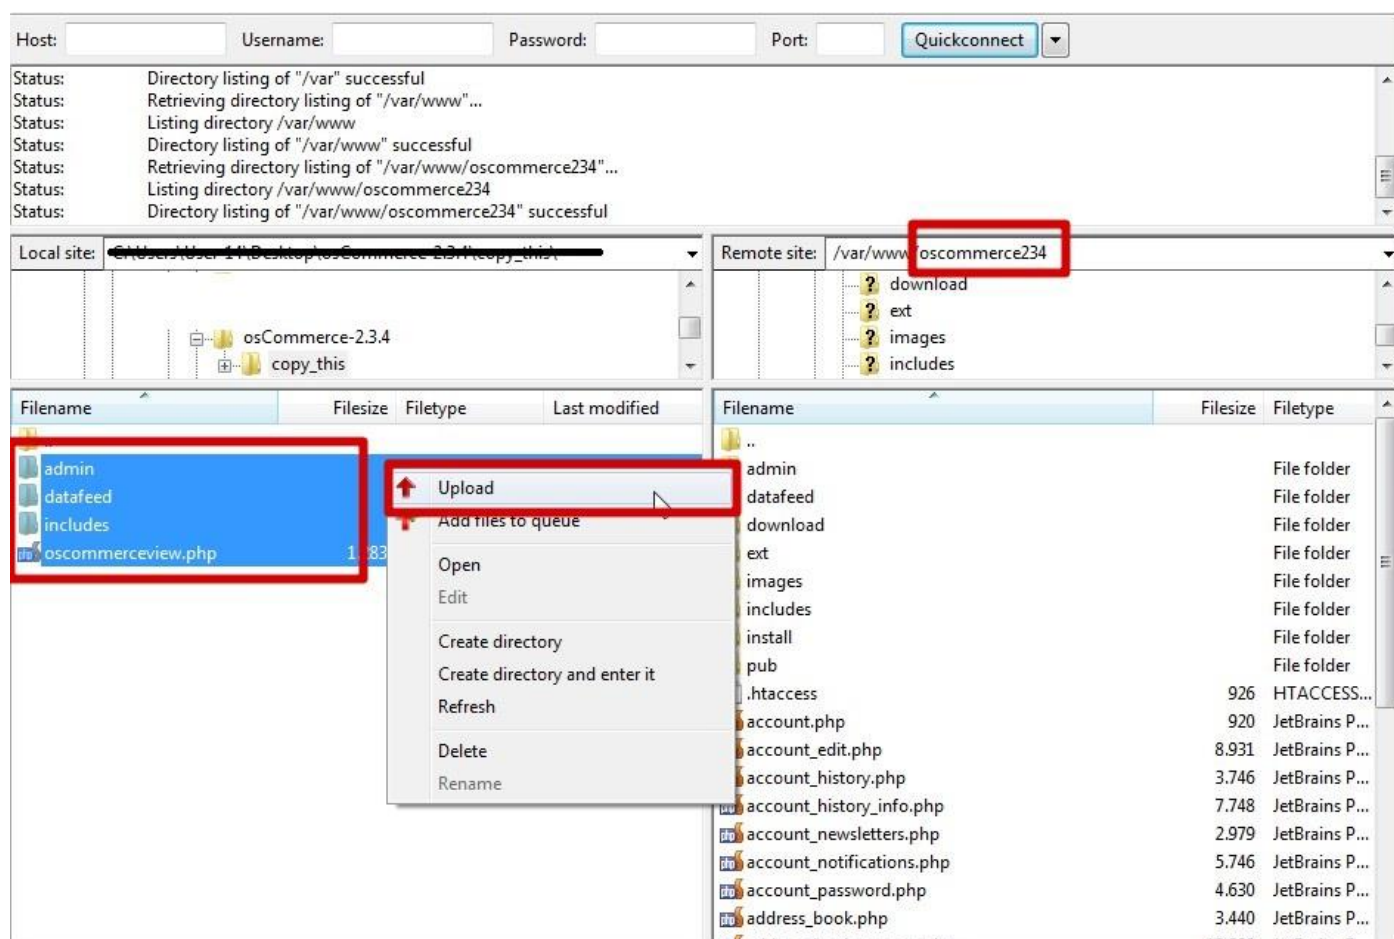

image 0

3. After copying the files Go to admin zone in your shop and find „Data Feed export” (image 1);

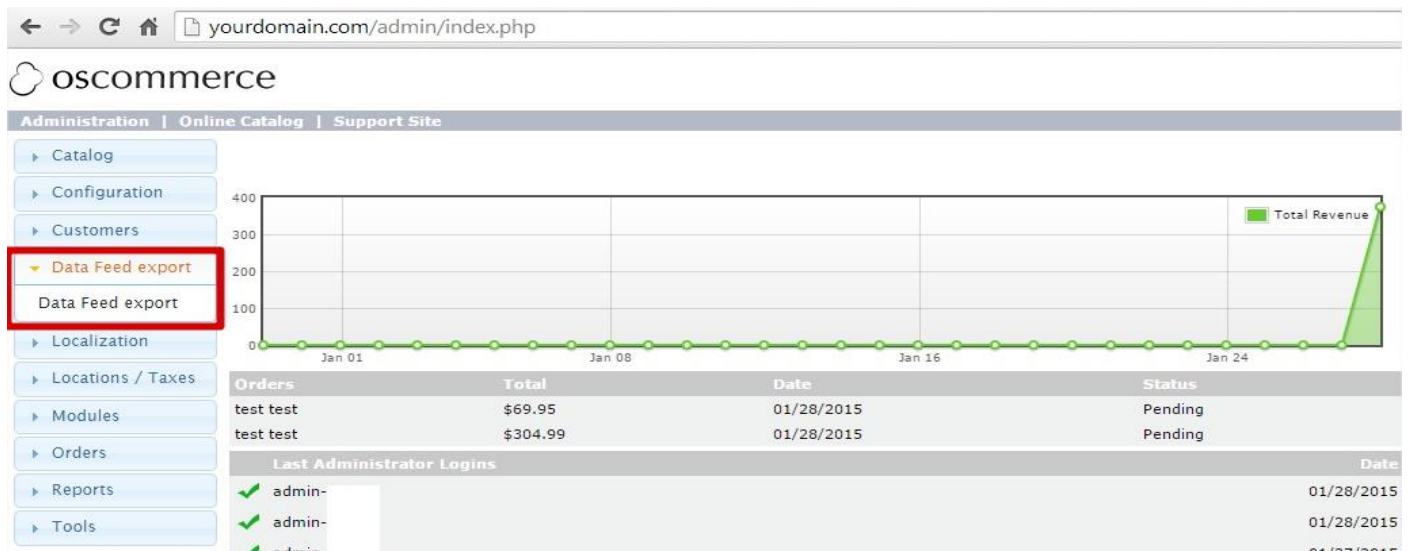

image 1

image 2 – admin zone for export plugin:

The screenshot shows the 'Data Feed export' configuration page in the oscommerce admin interface. The sidebar on the left contains the following navigation links: Catalog, Configuration, Customers, **Data Feed export** (highlighted with a red box), Localization, Locations / Taxes, Modules, Orders, Reports, and Tools. The main content area is divided into three sections:

- User API:** Includes fields for Username, Password, and Secret.
- Tracking Pixel:** Includes a checkbox for 'Enable Tracking Pixel' (checked), a dropdown for 'ModelOwn' (set to 'ModelOwn'), and a text field for 'Client Id'.
- Fields:** Includes a table of fields for product information:

Field	Value
Product EAN:	-----
Product ISBN:	-----
Subtitle:	-----
Manufacturer recommended price:	-----
YategoCategory:	-----
Base Unit:	-----
